SUBJECT: EXAMINATION REPORT **NO. 2018/142**

SAMPLE ACCEPTANCE DATE: 24.01.2018.
DATE OF ISSUING REPORT: 25.01.2018.

According to your requirement No. IU – Z – 630 dated 23/01/2018, the examination regarding the presence of radionuclides is done within the delivered sample and the following report has been made:

R E S U L T

Sample:
1.IU – Z – 01853 Biopro 21 (Low fat fully toasted soft soybean powder)
Country of Origin: /
Evidential number: 18/142

Radionuclide content in the sample (Bq /kg)	
^{137}Cs	**^{40}K**
< 0,8	764 ± 30

The results of measured radioactivity in the delivered sample show no radionuclide presence beyond the regulations (Council Regulation (EC) No:1048/2009 of 23.October 2009.)

The examination has been done by the method of low-level gamma spectrometry on HPGe detector based on IAEA Technical Report 295.
