DSM – Bright Science. Brighter Living™

Our company

Royal DSM is a global science-based company active in health, nutrition and materials. By connecting its unique competences in Life Sciences and Materials Sciences DSM is driving economic prosperity, environmental progress and social advances to create sustainable value for all stakeholders. DSM delivers innovative solutions that nourish, protect and improve performance in global markets such as food and dietary supplements, personal care, feed, pharmaceuticals, medical devices, automotive, paints, electrical and electronics, life protection, alternative energy and bio-based materials. DSM's 22,000 employees deliver annual net sales of around €9 billion. The company is listed on NYSE Euronext. More information can be found at www.dsm.com

Who we are

Who we are as a company is the result of strategic choices that we have made. These in turn are based on our mission and our core value; they define what we believe in and how we go about our business.

Our mission

Our purpose is to create brighter lives for people today and generations to come. We connect our unique competences in Life Sciences and Materials Sciences to create solutions that nourish, protect and improve performance.

Our core value

Our mission is supported by our core value: Sustainability. Everything we do should contribute to a more sustainable world. To us, achieving sustainability means simultaneously pursuing economic performance, environmental quality and social responsibility. In other words, we strive to create value on the three dimensions of People, Planet and Profit simultaneously.

Our brand promise

Bright Science. Brighter Living™. This sums up who we are, what we stand for and what we aim to achieve.

These four words are the shorthand for our mission, our beliefs and our behaviors – a promise that we make to the world in which we operate.

Bright Science refers to the unique way in which we combine Life Sciences and Materials Sciences disciplines, technologies and talents. We partner with customers and other stakeholders – then we share ideas, insights and inspiration to create innovative and sustainable solutions that address the key challenges facing society today.

Brighter Living refers to our commitment to creating products and solutions that make a positive difference to people's lives. We are constantly seeking new ways to improve quality of life, and we seek to make a positive contribution to the lives of people today and generations to come.

DSM Nutritional Products

DSM Nutritional Products is organized around three market-facing entities: **Animal Nutrition & Health**, **Human Nutrition & Health** and **Personal Care**. Human Nutrition & Health largely addresses the nutritional ingredients part of the food market. Animal Nutrition & Health addresses the nutritional additives segment of the feed market. Personal Care is focusing on the actives and ingredients in the sun care, skin care and hair care industries.

DSM is the only producer who can supply the complete range of vitamins, carotenoids and nutritional lipids in the most suitable forms for all possible human and animal uses. DSM is working from its strong basis as a global market leader in key value-added ingredients offered through an international infrastructure and reach unequaled by any competitor.

DSM is uniquely positioned in all three main steps of the value chain: the production of pure active ingredients, their incorporation into sophisticated forms, and the provision of tailored premixes. Being the only fully integrated player allows DSM to differentiate itself all the way through the chain.

Managing the interdependencies between active ingredients, forms and premixes, which have important implications for innovation, logistics, and value delivery, is a core competence of DSM.

What's new for 2013?

DSM recently completed the acquisition of **Ocean Nutrition Canada**, the leading global provider of fish oil derived nutritional products to the dietary supplement and food and beverage markets. The acquisition strengthens and complements DSM's newly established, global Nutritional Lipids growth platform. DSM can now uniquely offer a full range of products in the rapidly growing nutritional lipids category, offering both fish oil derived omega-3 fatty acids and microbially derived nutritional lipids.

New to DSM's product portfolio for 2013 are two dietary enzymes supporting the growing consumer demand for digestive health.

- **Tolerase™ L** is a highly effective digestive aid for people who suffer from lactose intolerance. It is an acid lactase that converts lactose, a milk sugar naturally present in dairy products, into glucose and galactose.
- **Tolerase™ P** is an enzyme called Phytase which breaks down phytate in cereal and legume-based foods. By doing so, Phytase leads to a release of iron, zinc, calcium, magnesium and phosphorus making these minerals bioavailable for the human body.

Now more than ever, consumers want **natural ingredients** in their foods, beverages, and dietary supplements. They associate what's natural with the healthy goodness that helps them maintain an active, balanced lifestyle. These consumers are seeking products with natural ingredients not only for their perceived health benefits but also because they feel that natural products mean higher standards of quality. For these vital reasons, DSM's portfolio of natural ingredients (see page 24) helps you differentiate your products and add value and more profits to your brands.

DSM launches its **customized antioxidant solutions for longer shelf life** of many different food and beverage applications. Antioxidant molecules that occur in nature can be effective alternatives to artificial antioxidants if used in the optimal combination and concentration for a specific food. With more than 40 years of experience in designing targeted blends of antioxidants, DSM is uniquely positioned to meet this growing consumer demand. See page 25 for DSM's antioxidant solutions for longer shelf life.

With the launch of 3 new health benefit solutions, DSM completes its portfolio of now 17 health benefit solutions. The new additions are:

- **RELAX YOUR MIND:** Relax and unwind with the help of functional ingredients designed to help clear your thoughts and calm your mind.
- **ENERGIZE YOUR MIND:** Energize your brain with functional ingredients developed to promote mental performance and focus.
- **ESSENTIALS FOR VEGETARIANS:** Customized ingredient solutions to help support the specific nutritional needs of vegetarians.

DSM Nutritional Products

A pioneer in innovation

Innovation is a survival skill. DSM Nutritional Products fosters this skill to the benefit of both the customers' future and that of the company. Lateral thinking and innovative attitudes are valuable tools with which to secure that future. These lead to discoveries that DSM then links to customers' needs, extending the range of offering and creating new business opportunities.

Starting in 1935 with the chemical synthesis of vitamin C, Roche had always been a pioneer in the industrial synthesis of vitamins and carotenoids. Today DSM's Nutrition cluster, which includes DSM Nutritional Products, maintains this tradition and invests more than 5% of its sales value in R&D, which is significantly higher than peers in the industry.

DSM's Research & Development activities are concentrated in the regions of Switzerland, the Netherlands, China and the United States in six Research Centers: Human Nutrition & Health, Animal Nutrition & Health, Personal Care, Process Research and Development, Product Form Development and Analytics.

Global operations

With ten large production sites (excluding premix) in Europe, the United States and China, six R&D centers in Europe and China, over 45 premix plants for animal or human nutrition and over 40 sales offices across the globe, DSM Nutritional Products is never far away from its customers and can make products in response to specific customer needs.

Our Customer Focus

The customer is at the center of all our activities. Everything we do – and this not only in our Marketing & Sales organization – we do for our customers. Customer intimacy is a key word at DSM Nutritional Products: it means that we listen to our partners and develop solutions that add value to their businesses.

Customer intimacy

The basis for all activities for and with our customers is our new Dual Track Strategy, which involves sustaining our established products while boosting the full growth of our new business. Apart from applying the strategy to interactions with customers, we also attach great importance to certain behaviors and values, in particular customer intimacy. This is based on mutual trust and respect. We strive to build relationships with our customers in which all issues can be openly addressed. This is the foundation for jointly developing solutions which benefit our customers and add value to their business. Key Account Management and regularly updated Customer Action Plans ensure that we can anticipate our customers' ever-changing needs.

Quality Management and Regulatory Affairs

DSM Nutritional Products constantly strives to maintain and advance its own high quality standards. Our aim is not only to be the benchmark for the industry but also to give our customers the peace of mind that only comes with quality.

We apply industry-appropriate Good Manufacturing Practice to our production operations worldwide. Every part of the process – from sourcing through production, quality assurance and storage to delivery – is managed so as to ensure the highest levels of process safety and product quality. All processes are designed to anticipate customer requirements and market trends. Beside product specification, DSM Nutritional Products provides clear statements concerning, for example, GMO ingredients, BSE/TSE, residual solvents limits, and the absence of allergenic potentials. In many cases, Kosher and Halal certificates issued by highly reputed international organizations are available.

These efforts are complemented by strict change control procedures and ISO 9001 certification.

Our dietary and food ingredients are manufactured following the HACCP concepts. DSM Nutritional Products produces vitamins for use as active pharmaceutical ingredients, operating in compliance with the worldwide accepted GMP standard ICHQ7a. CEP (Certificate of Suitability to the European Pharmacopoeia) are available for our full-range of vitamin straight portfolio.

Quality for Life™

A seal of excellence for our products and services

As the world's leading manufacturer of ingredients for health and nutrition, quality is at the heart of everything we do. This supports our ambition to fully understand our customers' needs, and runs from product conception through manufacturing, all the way to after-sales support.

For us at DSM, quality is a way of life. This is the core of our Quality for Life™ initiative.

It means you are getting the very best ingredients, you know where they come from and you know you can depend on their safe source. It symbolizes our commitment to our environment, our business partners, our people and the regulatory framework that governs our operations.

With our Quality for Life™ seal, we aim to ensure quality for you and for your customers.

The following trademark logos are part of the Quality for Life™ initiative and can be licensed to use on your end products:

Quali®-A	Quali®-D	Quali®-Biotin
Quali®-B	Quali®-E	Quali®-Carotene
Quali®-C	Quali®-K	Quali®-Blends

If you require information on Quality for Life™ or the Quali® trademarks, please contact your DSM representative or e-mail: quality.forlife@dsm.com

DSM Quali®-Blends. Our expertise at your service.

Quali®-Blends

Because you need more than single ingredients to support your challenges in responding to consumers' changing attitudes towards health and nutrition, we offer Quali®-Blends – our premix service which helps you to identify, assemble and incorporate the right ingredients into your products and brands. Supporting your challenges and innovation needs is our priority. With Quali®-Blends we put our vast and large experience and superior quality entirely at your service so you can reduce complexity in your value chain, increase efficiency, focus on your consumers and grow your brands. Via eight premix plants, five application laboratories and more than 40 sales offices you can rely on technical and analytical support globally. Moreover, our sales and marketing teams are organised around an industry segment approach with a strong end market focus in order to offer brand positioning support and technical expertise.

DSM's dedicated Quali®-Blends teams work globally and in your region to identify, assemble and incorporate the right combination of quality ingredients into your products. The result? Added value and reduced complexity for our customers.

- Over 40 strategically placed sales offices
- Eight premix plants worldwide
- Five high-tech application labs
- Presence on five continents
- One DSM – drawing on our expertise in Health, Nutrition and Materials to offer you cutting edge solutions

Quali®-Blends in your business

From the initial product concept stage to sales and brand management, DSM offers individual support at every stage of the value chain.

Idea generation and strategy

With a bank of product and application success stories and extensive consumer and market insights, we can help you create new products to meet consumer demand in the markets you serve.

Quality management

From source to shelf, DSM takes quality very seriously. Each Quali®-Blends premix goes through an extensive set of analytical tests before it reaches you.

Product development

Our experienced teams will work with you to create an effective premix form that will work in your application.

Production and distribution

Working with Quali®-Blends means fewer raw materials, speeding up the production process. Our experts are always available to respond to queries and help resolve any post-production issues.

Procurement

We procure in accordance with customer needs. We use our own ingredients where possible and only partner with trusted suppliers.

Sales and brand management

As your commercial partner, we remain at your service long after your product has hit the shelves. Whether it be co-branding, regional expansion or brand extension, we work with you to build the profile of your brands in your market.

Markets we serve

Working in a wide and ever-growing number of markets, our Quali®-Blends teams partner with our customers to find nutritional solutions for any product.

Beverages

Whether you want high quality nutritional ingredients or coloration-specific carotenoid formulations, Quali®-Blends contain everything you need for the perfect beverage.

Dairy

As the only nutritional ingredients manufacturer to supply complete ingredient solutions to the dairy industry, DSM understands the needs of producers at every stage in the development process.

Dietary supplements

DSM delivers tailor-made formulations, consumer insights and dietary supplement application expertise to meet the changing health interests of today's consumers.

Infant and maternal nutrition

From pre-pregnancy and pregnancy to birth, lactation and early infancy, Quali®-Blends help to ensure that infants get the best start in life with ingredients that adhere to exceptional standards of quality control.

Staple food fortification

A simple, safe and cost-effective way to add essential micronutrients to food, Quali®-Blends are helping to reduce 'hidden hunger' through DSM's Nutrition Improvement Program. Oils and fats: Backed by strong science, DSM has a broad portfolio of nutrients and our team of technical experts offer formulation advice and regulatory support.

Bakery and Cereals

Quali®-Blends contain vitamin, mineral and nutritional ingredients to boost the consumer appeal of cereal products.

Health Benefit Solutions by DSM

Wherever we are, we are all consumers and we all care about healthy living.

DSM is uniquely positioned to help you make your products attractive to health-conscious consumers. We have the world's broadest portfolio of innovative, high-quality health nutrients. This is the solid basis for the health benefit solutions. But that's just start...

- DSM can support you with thorough scientific expertise and technical know-how.
- Our application labs and Quali®-Blends operations are active on all continents.
- With a presence in over 50 countries, our sales force is always close to hand.

Last but not least, our total quality assurance and dedication to a sustainable and responsible way of doing business are core to our Quality for Life™ promise. We are focussing our value proposition on key health benefits that concern consumers everywhere:

- **Defy your age**
We can help you to add more life to your years
- **Empower your mind**
Stay ahead! Boost your mind with our ingredients
- **Energize your mind**
Energize your brain with functional ingredients developed to promote mental performance and focus
- **Enhance your immunity**
Our know-how helps you to protect your health
- **Essentials for kids and teens**
Our tailored nutrients can help children during all phases of childhood to grow up to their full potential
- **Essentials for life**
Our complete mix of nutrients are the solid foundation for a healthy life
- **Essentials for men**
Customised solutions for men's specific needs
- **Essentials for women**
Our tailored ingredients can help fulfil women's specific needs
- **Essentials for vegetarians**
Customized ingredient solutions to help support the specific nutritional needs of vegetarians
- **Flex your joints**
Our ingredients help you to flex freely
- **Guard your heart**
Rely on us to help protect your heart and take pressure out
- **Nourish your beauty**
Our ingredients help to protect or repair your skin, hair or nails from within
- **Power your performance**
Charging your body to reach beyond your limits
- **Relax your mind**
Relax and unwind with the help of functional ingredients designed to help clear your thoughts and calm your mind
- **Shape your body**
Our natural ingredients help you to shape up and resist temptation
- **Strengthen your bone**
Bones live! Build them throughout life with our portfolio of bone actives
- **Upgrade your vision**
Protect and improve your eyesight with the help of our carotenoids and vitamins

In short, DSM can help you get to market faster with health benefit solutions that appeal to consumers – and that really work.

Fat-soluble vitamins

PRODUCT AND DESCRIPTION	COMPENDIA / CERTIFICATION	PACK SIZE (KG)	PRODUCT CODE	MAIN APPLICATION
Vitamin A – liquid 				
Vitamin A Acetate 1.5 MIU/g Stabilized with tocopherol. 450 mg Retinol Equivalent/g	USP*, FCC*, Ph. Eur.*, Kosher for Passover- Kitniot (BK), Halal	5	04 18846.294	For dietary supplement and food preparations.
Vitamin A Palmitate 1.0 MIU/g Stabilized with tocopherol. Oily solution (peanut oil). 300 mg Retinol Equivalent/g	USP*, FCC*, Ph. Eur.*, Kosher for Passover- Kitniot (BK), Kosher Parve (OU), Halal	5	04 31400.294	For dietary supplement and food preparations.
Vitamin A Palmitate/M 1.0 MIU/g Stabilized with tocopherol. Oily solution medium chain triglycerides. Allergen-free. 300 mg Retinol Equivalent/g	USP*, FCC*, Ph. Eur.*, Kosher for Passover- Kitniot (BK), Halal	5	50 08530.294	For dietary supplement and food preparations.
Vitamin A Palmitate 1.0 MIU/g Stabilized with BHA/BHT. Oily solution (peanut oil). 300 mg Retinol Equivalent/g	USP*, FCC*, Ph. Eur.*, Kosher for Passover- Kitniot Kosher Parve (OU), (BK), Halal	5	04 20603.294	For dietary supplement and food preparations.
Vitamin A Palmitate 1.7 MIU/g Stabilized with BHA/BHT. 510 mg Retinol Equivalent/g	USP*, FCC*, Ph. Eur.*, Kosher for Passover- Kitniot (BK), Kosher Parve (OU), Halal	5 20	04 24013.294 04 24013.336	For dietary supplement and food preparations.
Vitamin A Palmitate 1.7 MIU/g Stabilized with tocopherol. 510 mg Retinol Equivalent/g	USP*, FCC*, Ph. Eur.*, Kosher for Passover- Kitniot (BK), Kosher Parve (OU), Halal	5 5 [†] 190	04 18579.294 04 18579.694 04 18579.422	For soft gelatin capsules. For fortification of fat-based foods, milk, margarine, dairy products and dairy substitutes.
Vitamin A Palmitate 1.7 MIU/g Without stabilizers. 510 mg Retinol Equivalent/g	USP*, FCC*, Ph. Eur., Kosher for Passover- Kitniot (BK), Kosher Parve (OU), Halal	20 190 [†]	04 24005.336 04 24005.420	For soft gelatin capsules. For fortification of fat-based foods, milk, margarine, dairy products and dairy substitutes.
Vitamin A Palmitate 1.0 MIU/g and Vitamin D3 100,000 IU/g Stabilized with tocopherol. Oily solution (corn oil). 300 mg Retinol Equivalent/g and 2.5 mg cholecalciferol/g	USP*, FCC*, Ph. Eur.*, Kosher for Passover- Kitniot (BK), Kosher Parve (OU), Halal	5 5 [†]	50 11558.294 50 11558.694	For soft gelatin capsules. For fortification of fat-based foods, milk, margarine, dairy products and dairy substitutes.

Fat-soluble vitamins

PRODUCT AND DESCRIPTION	COMPENDIA / CERTIFICATION	PACK SIZE (KG)	PRODUCT CODE	MAIN APPLICATION
Vitamin A – liquid <i>continued</i> 				
Vitamin A Water-miscible Type 100 Stabilized with BHA/BHT. 30 mg Retinol Equivalent/g	USP*, FCC*, Ph. Eur.* Halal	6 L	04 21316.126	For liquid oral dietary supplement preparations.
Vitamin A + D3 Water-miscible Type 100/20 Stabilized with BHA/BHT. 30 mg Retinol Equivalent/g and 0.5 mg cholecalciferol/g	USP*, FCC*, Ph. Eur.* Halal	5	50 11566.126	For liquid oral dietary supplement preparations.

* Active ingredient only. † Only for North America market.

Vitamin A – dry 				
Dry Vitamin A Acetate 500 B Stabilized with BHT. Beadlet, tablet grade. Based on bovine gelatin. 500,000 IU Vitamin A/g. 150 mg Retinol Equivalents/g	USP*, FCC*, Ph. Eur.*, Kosher Ko	5 25	50 12279.609 50 12279.656	For direct compression tablets and hard-shell capsules. For general food fortification.
Dry Vitamin A Acetate 325 CWS/A Stabilized with tocopherol. Beadlet, cold water dispersible. Based on gum acacia. 325,000 IU Vitamin A/g. 97.5 mg Retinol Equivalents/g	USP*, FCC*, Ph. Eur.*, Kosher Parve (OU), Halal	5 20	50 13526.304 50 13526.341	For general food preparation including infant nutrition. Animal ingredient free, Allergen-free and GMO-free.
Dry Vitamin A Palmitate, Type 250 CWS Stabilized with BHA, BHT. Beadlet, cold water dispersible. 250,000 IU Vitamin A/g. 75 mg Retinol Equivalents/g	USP*, FCC*, Ph. Eur.*	25	04 29937.368	For dry dietary supplement and food preparations which are reconstituted with liquids, especially for effervescent tablets. For fortification of sugar.
Dry Vitamin A Palmitate, Type 250 CWS/F Stabilized with tocopherol. Beadlet, cold water dispersible. Based on fish gelatin. 250,000 IU Vitamin A/g. 75 mg Retinol Equivalents/g	USP*, FCC*, Ph. Eur.*, Kosher Parve (OU) (BK), Halal	25 25†	04 21871.368 04 21871.868	For effervescent and coated tablet and hard-shell capsules. For fortification of dry food products, including flour, dry milk and beverage powders and water-based foods.
Dry Vitamin A Palmitate 250 S/N Stabilized with BHT. Spray dried, starch based. 250,000 IU Vitamin A/g. 75 mg Retinol Equivalents/g	USP*, FCC*, Ph. Eur.*, Kosher Parve (OU) (BK) Halal	20	50 12554.341	For fortification of flour, beverages, sugar and water-based food products.
Dry Vitamin A Palmitate 250 S/N-B Stabilized with BHT and sodium ascorbate. Beadlet, cold water dispersible. Starch-based. 250,000 IU Vitamin A/g. 75 mg Retinol Equivalents/g	USP*, FCC*, Ph. Eur.*, Kosher Parve (OU) (BK), Halal	5 25	50 03814.304 50 03814.606	For dry dietary supplement and food preparations, especially for fortification of sugar.
Dry Vitamin A Palmitate 50 Stabilized with BHT and sodium ascorbate. Starch-based. 50,000 IU Vitamin A/g. 1.5 mg Retinol Equivalents/g	USP*, FCC*, Ph. Eur.*, Kosher Parve (OU) (BK), Halal	25	50 10446.368	For optimal fortification of sugar. Easy to handle and providing superior content uniformity in the final sugar.

* Active ingredient only. † Only for North America market.

Vitamin D3 – liquid (Cholecalciferol) 				
Vitamin D3 1.0 MIU/g Stabilized with tocopherol. Oily solution medium chain triglycerides. 25 mg cholecalciferol/g	USP*, FCC* Ph. Eur.*, Kosher for Passover- Kitniot (BK), Kosher Parve (OU), Halal	5	50 11574.29	For soft gelatin capsules. For fortification of fat-based foods, edible oils, fats, milk, margarine and dairy products.

* Active ingredient only. † Only for North America market.

Vitamin D3 – dry (Cholecalciferol) 				
Vitamin D3 Crystalline 40,000,000 IU Vitamin D3/g. 1,000,000 µg cholecalciferol/g	USP, FCC, Ph. Eur., Kosher Parve (OU) (BK), Halal	25 g 250 g	50 09278.236 50 09278.258	For dietary supplements, food preparations and pharmaceutical applications.
Dry Vitamin D3, Type 100 CWS Stabilized with tocopherol. Beadlet, cold water dispersible. 100,000 IU Vitamin D3/g 2.5 mg cholecalciferol/g	USP*, FCC Ph. Eur. Kosher Ko	5 25	50 12015.304 50 12015.368	For direct compression tablets and hard-shell capsules. For fortification of dry food products, including flour, dry milk and beverage powders. For general fortification of water-based foods.
Dry Vitamin D3 100 CWS/AM Stabilized with tocopherol. Based on gum acacia. 100,000 IU Vitamin D3/g. 2.5 mg cholecalciferol/g	USP*, FCC*, Ph. Eur., Kosher Parve (OU) (BK), Halal	25	50 11477.368	For hard-shell capsules. For fortification of dry food products, including flour, dry milk and beverage powders. For general fortification of water-based foods.
Dry Vitamin D3 100 SD/S Stabilized with tocopherol. Spray dried, cold water dispersible. Starch based/Allergen free. 100,000 IU Vitamin D3/g 2.5 mg cholecalciferol/g	USP*, FCC*, Ph. Eur.*, Kosher Parve (OU) (BK), Halal, Halal-Ifanca	5 20	50 10950.304 50 10950.341	For direct compression tablets and hard-shell capsules. For fortification of dry food products, including flour, dry milk and beverage powders. For general fortification of water-based foods.

* Active ingredient only.

Fat-soluble vitamins

PRODUCT AND DESCRIPTION	COMPENDIA / CERTIFICATION	PACK SIZE (KG)	PRODUCT CODE	MAIN APPLICATION
Vitamin E – liquid (dl-α-Tocopherol, dl-α-Tocopheryl Acetate)				
dl-α-Tocopherol 1100 IU Vitamin E/g 738 mg α -Tocopherol Equivalent/g	USP, FCC, Ph. Eur., Kosher for Passover (OU) (BK), Halal	5 20 50 [†]	04 10276.294 04 10276.336 04 10276.396	For soft gelatin capsules. As an antioxidant stabilizing oils and fat-based foods.
dl-α-Tocopheryl Acetate 1000 IU Vitamin E/g 671 mg α -Tocopherol Equivalent/g	USP, FCC, Ph. Eur., Kosher for Passover (OU) (BK), Halal	5 20 190 20 [†]	04 20085.301 04 20085.331 04 20085.422 04 20085.633	For soft gelatin capsules. For fortification of oils and fat-based foods.

[†] Only for North America market.

Vitamin E – dry (dl-α-Tocopheryl Acetate)				
Dry Vitamin E 15% CC Spray dried. Starch based. Crystal clear. 150 IU Vitamin E/g 101 mg α -Tocopherol Equivalent/g	USP*, FCC*, Ph. Eur., Kosher Parve (OU) (BK), Halal	15	50 01285.281	For fortification of foods and beverages requiring optical clarity, non-ringing.
Dry Vitamin E 50% CWS/S Spray dried, cold water dispersible. Starch based. 500 IU Vitamin E/g 336 mg α -Tocopherol Equivalent/g	USP*, FCC*, Ph. Eur., Kosher Parve (OU) (BK), Halal	20 20	50 01129.341 (Origin: Swiss) 50 12740.341 (Origin: France)	For tablets, effervescent tablets and hard-shell capsules. For fortification of foods and beverages.
Dry Vitamin E 50%, Type SD Spray dried. 500 IU Vitamin E/g 336 mg α -Tocopherol Equivalent/g	USP*, Ph. Eur., Kosher Ko	15 15	04 39622.281 (Origin: Swiss) 50 14077.281 (Origin USA)	For tablets and hard-shell capsules. For fortification of dry foods products, including those to be mixed with cold water before use.
Dry Vitamin E Acetate 50% Type SD Spray dried. 500 IU Vitamin E/g 336 mg α -Tocopherol Equivalent/g	USP*, Ph. Eur., Kosher Ko	50 [†]	04 88550.395	For tablets and hard-shell capsules. For fortification of dry foods products, including those to be mixed with cold water before use.
Dry Vitamin E 75 HP Beadlet, High potency. 750 IU Vitamin E/g 503 mg α -Tocopherol Equivalent/g	USP*, FCC*, Ph. Eur., Kosher Parve (OU) (BK), Kosher Ko, Halal	20 50 [†]	04 83567.341 04 83567.402	For higher levels of vitamin E in tablets and hard-shell capsules.

* Active ingredient only. [†] Only for North America market.

Vitamin E – Natural Source (d-α-Tocopheryl Acetate)				
d-α-Tocopheryl Acetate 1360 IU Vitamin E/g 913 mg α -Tocopherol Equivalent/g	USP, FCC, Ph. Eur., Kosher for Passover- Kitniot (BK), Kosher Parve (OU), Halal	20 190	04 86574.343 04 86574.422	For soft gelatin capsules. For fortification of oils and fat-based foods.
Dry Vitamin E 700 NS Spray dried, cold water dispersible. Starch based. 700 IU Vitamin E/g 470 mg α -Tocopherol Equivalent/g	USP*, FCC*, Ph. Eur.*, Kosher Parve (OU) (BK), Kosher Ko, Halal	20	50 11892.341	For hard-shell capsules. For fortification of foods and beverages.
Dry Vitamin E Acetate 950 NS Beadlet, High potency. 950 IU Vitamin E/g 638 mg α -Tocopherol Equivalent/g	USP*, FCC*, Ph. Eur.*, Kosher Parve (OU) (BK), Kosher Ko, Halal	5 20 50 [†]	04 86884.304 04 86884.341 04 86884.402	For higher levels of vitamin E in tablets and hard-shell capsules.

* Active ingredient only. [†] Only for North America market.

Mixed Tocopherols				
Mixed Tocopherol 95	FCC, JECFA, Kosher for Passover-Kitniot (BK), Kosher Parve (OU), Halal	20 190	50 02893.343 50 02893.422	As an antioxidant stabilizing oils and fat-based foods. For soft gelatin capsules.
Dry Mixed Tocopherols 30%	FCC*, JECFA*, Kosher Parve (OU) (BK), Halal	20	50 00149.341	For dry vitamin/mineral formulations and as an antioxidant stabilizing fats and oils.

* Active ingredient only.

Vitamin K1 (Phylloquinone, Phytonadione, Phytomenadione)				
Vitamin K1 Oily solution	USP, FCC, Ph. Eur., Kosher for Passover (BK), Kosher Parve (OU), Halal	100 g 1	04 35015.246 04 35015.264	For soft gelatin capsules. For fortification of selected foods.
Dry Vitamin K1 5% SD Based on gum acacia. 50 mg Vitamin K1/g	USP*, FCC*, Ph. Eur.*, Kosher for Passover (BK), Kosher Parve (OU), Halal	1 20	04 34922.268 04 34922.341	For tablets, hard-shell capsules and infant formulations. For fortification of dry food products, including those to be mixed with cold water before use.

* Active ingredient only.

Water-soluble vitamins

PRODUCT AND DESCRIPTION	COMPENDIA / CERTIFICATION	PACK SIZE (KG)	PRODUCT CODE	MAIN APPLICATION
Thiamin (Vitamin B₁) 				
Thiamine Hydrochloride	USP, FCC, Ph. Eur., Kosher for Passover (BK), Kosher Parve (OU), Halal	20	04 13038.341	For solid and liquid vitamin/mineral formulations. For general food fortification and dietary supplement applications.
Thiamine Mononitrate	USP, FCC, Ph. Eur., Kosher for Passover (BK), Kosher Parve (OU), Halal	20	04 18943.341	For solid and liquid vitamin/mineral formulations. For general food fortification and dietary supplement applications.
ROCOAT® Thiamine Mononitrate 33 1/3% Coated	USP*, Ph. Eur.*, Kosher Parve (OU), Halal, Ifanca Halal	5 50 [†]	04 29473.304 04 29473.402	For chewable tablets. For fortification of foods where improved stability or taste masking is desired.

* Active ingredient only. † Only for North America market.

Riboflavin (Vitamin B₂) 				
Riboflavin 5'-Phosphate Sodium	USP, JECFA, FCC, Ph. Eur., Kosher Parve (OU) (BK), Halal	1 5 25	04 21413.608 04 21413.605 04 21413.672	For solid and liquid vitamin/mineral formulations. For general food fortification and dietary supplement applications.
Riboflavin Tablet Grade	USP, JECFA, FCC, Ph. Eur., Kosher Parve (OU) (BK), Halal	10	04 70295.231	Especially suited for direct compression of tablets. May also be used for enrichment of cereals, pasta dietetics and other dry food preparations, and for the coloration of light-protected food products in liquid and powder form.
Riboflavin Universal	USP, JECFA, FCC, Ph. Eur., Kosher Parve (OU) (BK), Halal	10	04 70406.231	For the enrichment of cereals, pasta, dietetics and other dry food preparations, and for the coloration of light-protected food products in liquid and powder form.
Riboflavin Universal Fine Powder	USP, JECFA, FCC, Ph. Eur., Kosher Parve (OU) (BK), Halal	5	50 08611.295	For the enrichment of cereals, pasta products, dietetics and other dry foods preparations, and for the coloration of light-protected food products in liquid and powder form. For chewable tablets.
ROCOAT® Riboflavin 33 1/3% Coated	USP*, JECFA*, Ph. Eur.*, Kosher Parve (OU), Halal, Ifanca Halal	5 50 [†]	04 29465.304 04 29465.402	For chewable tablets. For fortification of foods where improved stability and taste-masking is desired.

* Active ingredient only. † Only for North America market.

Water-soluble vitamins

PRODUCT AND DESCRIPTION	COMPENDIA / CERTIFICATION	PACK SIZE (KG)	PRODUCT CODE	MAIN APPLICATION
Niacin (Niacinamide, Vitamin B3)				
Niacinamide	USP, FCC, Ph. Eur., Kosher Parve (OU) (BK), Halal	20	04 87848.340	For solid and liquid vitamin/mineral formulations. For general food fortification and dietary supplement applications.
Niacinamide Free Flowing	USP*, FCC*, Ph. Eur., Kosher Parve (OU)	25 [†]	50 02141.346	For solid and liquid vitamin/mineral formulations. For general food fortification.
Niacinamide Powder	USP, FCC, Ph. Eur., Kosher Parve (OU), Halal	25	50 10810.366	For solid and liquid vitamin/mineral formulations. For general food fortification.
Niacin Nicotinic acid Powder	USP, FCC, Kosher for Passover (BK), Kosher Parve (OU), Halal	20 500 [†]	50 10837.340 50 10837.429	For solid and liquid vitamin/mineral formulations. For general food fortification.

	Fabules®	Specialty emulsion for weight management.	For use in foods and beverages.
	PeptoPro®	Dairy-based peptide for improved sports performance.	For use in foods, powdered beverages and gels.
	ALL-Q®	Coenzyme Q10.	For use in foods, beverages and supplements.
	Teavigo®	High-purity EGCG.	For use in foods, beverages and supplements.
	Tolerase™ L	Acid lactase.	For use in dietary supplements and foods.
	Tolerase™ P	Phytase.	For use in foods, beverages and dietary supplements.

* While labeling regulations vary by country, DSM can support our customers' positioning of natural with the above ingredients.

** life'sDHA™ is naturally sourced.

Antioxidants for longer shelf life

PRODUCT AND DESCRIPTION	COMPENDIA / CERTIFICATION	PACK SIZE (KG)	PRODUCT CODE	MAIN APPLICATION
dl-α-Tocopherol 1100 IU Vitamin E/g 738 mg α -Tocopherol Equivalent/g	USP, FCC, Ph. Eur., Kosher for Passover (OU) (BK), Halal	5 20 50 [†]	04 10276.294 04 10276.336 04 10276.396	For soft gelatin capsules. As an antioxidant stabilizing oils and fat-based foods.
Mixed Tocopherol 95	FCC, JECFA, Kosher for Passover-Kitniot (BK), Kosher Parve (OU), Halal	20 190	50 02893.343 50 02893.422	As an antioxidant stabilizing oils and fat-based foods. For soft gelatin capsules.
Dry Mixed Tocopherols 30%	FCC*, JECFA*, Kosher Parve (OU) (BK), Halal	20	50 00149.341	For dry vitamin/mineral formulations and as an antioxidant stabilizing fats and oils.
Ascorbic Acid	USP, JECFA, FCC, Ph. Eur., Kosher Parve (OU) (BK), Ifanca, Halal	25 25 500	04 08050.366 04 08050.368 04 08050.429	For solid and liquid vitamin/mineral formulations. For general food fortification, as a dough conditioner, as an antioxidant and for curing meats.
Sodium Ascorbate Crystalline	USP, JECFA, FCC, Ph. Eur., Kosher Parve (OU) (BK), Halal	25	04 08174.606	For solid and liquid vitamin/mineral formulations. For general food fortification, as a dough conditioner, as an antioxidant and for curing meats.
Ascorbyl Palmitate	USP, JECFA, FCC, Ph. Eur., Kosher Parve (OU) (BK), Halal	5 25	04 18595.304 04 18595.368	As an antioxidant to stabilize oils and fat-based foods.
RONOXAN® A Ascorbyl Palmitate, dl- α -Tocopherol, Lecithin	Kosher Parve (OU) (BK), Halal	1	04 42534.270	As an antioxidant for vegetable oils, animal fats, and fat containing products such as sauces, salad dressings, mayonnaise and biscuits.
Teavigo® Crystalline powder, minimum 90% EGCG from natural green tea extract	Kosher Parve (OU) (BK), Halal	1	50 09227.270	For fortification of selected foods and beverages.

Ronoxan®

Please contact your DSM representative to find out which synergistic Ronoxan® antioxidant blends can be used to protect your application.

* Active ingredient only. [†]Only for North America market

Additional information

Carotenoids

β-Carotene

ROLE: β-carotene serves as an important source of vitamin A and is converted into vitamin A as the body needs it. The additional health promoting effects of β-carotene may be due to its ability to act as an antioxidant when consumed at dietary intake levels.

FOOD SOURCES: Dark green leafy vegetables and dark yellow/orange fruits and vegetables.

Apocarotenal

ROLE: Apocarotenal is scientifically recognized to provide about 50% of vitamin A activity of β-carotene.

FOOD SOURCES: Citrus fruits and green vegetables such as oranges or spinach.

Lutein

ROLE: In addition to zeaxanthin, lutein is the other major carotenoid found in the eye, specifically located in the macula. Lutein is a potent antioxidant and acts as a filter and shield against the damaging near-to-UV blue light from the sun. Higher dietary intake of foods rich in lutein and zeaxanthin has been associated with a reduced risk of macular degeneration and cataracts. Lutein cannot be synthesized by humans and must be taken from the diet. The recent findings of scientific studies point to a lutein role also for visual performance in healthy people.

FOOD SOURCES: Dark green leafy vegetables and other yellow/orange fruits and vegetables, such as cabbage (outside leaves), watercress, spinach, parsley, greens, peas, broccoli, lettuce and pepper.

Lycopene

ROLE: Lycopene is the carotenoid responsible for the red color in tomatoes and is the most abundant carotenoid in human serum. As a strong antioxidant, lycopene helps to protect our bodies from free radicals which can not only cause damage to body cells but also play a role in serious illnesses. Several epidemiological studies have associated lycopene with a reduced risk of prostate cancer and cardiovascular disease.

FOOD SOURCES: Tomato and a variety of red fruits and vegetables, such as watermelon, pink grapefruit and guava.

Zeaxanthin

ROLE: Zeaxanthin is in addition to lutein the only other major carotenoid specifically located in the macula of the eye. Zeaxanthin is the most potent antioxidant carotenoid found in the retina and acts as a filter and shield against the damaging near-to-UV blue light from the sun. Higher dietary intake of foods rich in lutein and zeaxanthin has been associated with a reduced risk of macular degeneration and cataracts. Zeaxanthin cannot be synthesized by humans and must be taken from the diet. The recent findings of scientific studies point to a zeaxanthin role also for visual performance in healthy people.

FOOD SOURCES: Dark green leafy vegetables and other yellow/orange fruits and peppers, persimmons, corn, spinach, turnip greens, collard greens, lettuce, kale, mandarin and tangerine.

Nutraceuticals and specialty products

Genistein

ROLE: Genistein is an isoflavone found in soybeans, soy flour, soy milk, soy protein concentrate (water washed), soy protein isolates, that has the ability to bind selectively to the estrogen alpha and beta receptors and modulate gene expression. geniVida®/BONISTEIN® can aid in restoring the balance between the bone-building osteoblasts and the bone-dissolving osteoclasts and help to maintain healthy bone density in postmenopausal women. Genistein has also been clinically proven to reduce menopausal symptoms, including hot flashes.

FOOD SOURCES: Soybeans, soy flour, soy milk, soy protein concentrate (water washed), soy protein isolates, miso, tempeh, tofu and foods made with these ingredients.

Trans-resveratrol

ROLE: Resveratrol is a polyphenol produced by plants to protect them from environmental stress. It has antioxidant activity and is most known as the component in red wine that may confer heart health benefits in the French population despite a high fat intake, i.e. the French Paradox. Recent studies demonstrate resveratrol mimics the effect of caloric restriction, the only known intervention to extend lifespan in mammals. Accordingly, resveratrol has been shown not only to extend the lifespan of aged mice on a high fat diet, but also to preserve the health of aging mice through maintenance of cardiac function, muscle function and blood sugar control.

FOOD SOURCES: Wine, grapes, peanuts and berries.

Coenzyme Q10

ROLE: Coenzyme Q10 (CoQ10) is an antioxidant involved in energy metabolism in all cells in the body. Studies in individuals with cardiovascular disease, in particular those with heart failure and hypertension, report the most consistent improvement in symptoms when CoQ10 is taken as a supplement.

FOOD SOURCES: Beef, chicken, pork, herring, and trout; small amounts in some vegetables such as broccoli and cauliflower.

Emulsion of palm and oat oil (Fabulesse®)

ROLE: Fabulesse® is a patent-protected combination of palm and oat oil (both naturally occurring lipids) that is formulated in a novel emulsion therefore helping people to manage their energy intake. Its microstructure prevents early digestion and triggers an “appetite satisfied” signal to the brain, therefore helping people to manage their calorie intake. Fabulesse® can be incorporated in foods or marketed as a weight management supplement.

FOOD SOURCES: Palm and oat.

Epigallocatechin gallate

ROLE: EGCG is the most abundant catechin found in green tea, with demonstrated potent antioxidant and anti-inflammatory activity. Based on pre-clinical and clinical studies EGCG has been associated with reducing the risk for various chronic diseases such as cancer, cardiovascular and neurological diseases.

FOOD SOURCES: EGCG is found naturally in green tea leaves and is found in varying concentrations in green tea, oolong tea, and black tea extracts and beverages.

Dairy-based peptide (PeptoPro®)

ROLE: PeptoPro® is a highly hydrolyzed enzymatic digest of casein manufactured utilizing a proprietary mix of enzymes to provide a high quality source of peptides with excellent taste. High levels of di and tri peptides in combination with a low level of free amino acids provide PeptoPro® with excellent nutritional value, instant solubility and low levels of bitterness. Human studies have proven that PeptoPro® plays an important role in sports applications such as endurance, performance and muscle recovery. PeptoPro® qualifies as a superior protein source to cover daily needs of protein.

EU HEALTH CLAIM:

Protein contributes to a growth in muscle mass.
Protein contributes to the maintenance of muscle mass.

FOOD SOURCES: Dairy, specialized hydrolysates.

Tomato-based extract (FruitFlow®)

ROLE: Fruitflow® is a water-soluble tomato-based extract. This breakthrough ingredient helps maintain normal platelet aggregation, which contributes to healthy blood flow. In human trials, consumption of the Fruitflow® has been proven to reduce platelet aggregation in 97% of subjects. The acute effect takes place within 1,5 hours of consumption and lasts for 12 to 18 hours. When taken regularly on a once per day basis, the effect is continuous.

EU HEALTH CLAIM:

Fruitflow® helps maintain normal platelet aggregation, which contributes to healthy blood flow.

FOOD SOURCES: Tomatoes.

Nutraceuticals and specialty products *continued*

Phytase (Tolerase™ L)

ROLE: Tolerase™ L is a micro granulated food enzyme preparation containing acid lactase. Lactase is needed to digest lactose, which is the main carbohydrate source of dairy products. Since many adults don't produce enough lactase, lactose is not properly digested in the small intestine but fermented by the microbial flora in the large intestine. The resulting byproducts cause diarrhea, abdominal cramps, flatulence and nausea. The use of lactase can prevent these unpleasant side-effects of consuming dairy products. Acid lactase works especially well at low pH making it particularly suitable to digest lactose in the stomach.

EU HEALTH CLAIM:

Lactase enzyme improves lactose digestion in individuals who have difficulty digesting lactose.

Phytase (Tolerase™ P)

ROLE: Tolerase™ P is a micro granulated food enzyme preparation containing phytase. Whole grains, legumes and nuts contain phytate. Phytate inhibits absorption of minerals such as iron, zinc and calcium. Phytase can break apart phytate and make these minerals bioavailable. This is especially important for people not regularly consuming meat. Phytase works especially well at low pH making it particularly suitable to digest phytate in the stomach.

Cytidine-5'-Monophosphate Free Acid

Uridine-5'-Monophosphate Disodic

Inosine-5'-Monophosphate Disodic

Guanosine-5'-Monophosphate Disodic

Adenosine-5'-Monophosphate Free Acid

ROLE: Nucleotides are vital constituents of all living cells. They play major roles in almost all physiological processes, in particular in cells/organs which replicate/proliferate rapidly, such as in growing tissue, in development and in repair. They are building blocks of deoxyribonucleic acid (DNA) and ribonucleic acid (RNA) and have an important function in cellular energy and metabolism particularly as components of ATP and many coenzymes.

For Infant Nutrition, the major functional benefits for Nucleotides are:

- **Growth and development:** for the rapidly growing baby, Nucleotides are required for the production of new cells.
- **Helping immunity:** Contributes to protect the baby's delicate system from being attacked by viruses and bacteria. Helps to support higher antibody response to vaccinations.
- **Good gut function:** promotes the growth of 'good' bacteria which protect the gut against harmful bacteria.

FOOD SOURCES: Present in the whole food chain.

Water-soluble vitamins

Thiamin

ROLE: Thiamin is required to help the body use its major source of energy, carbohydrates, to the fullest extent. Thiamin is also essential for proper muscle coordination, the maintenance of peripheral nerve tissue and for normal growth.

EU HEALTH CLAIMS:

Thiamine contributes to normal energy-yielding metabolism.
Thiamine contributes to normal functioning of the nervous system.
Thiamine contributes to normal psychological function.
Thiamine contributes to the normal function of the heart.

FOOD SOURCES: Cereals, whole grains, pork, beef, lamb and poultry.

Riboflavin

ROLE: Riboflavin is important in helping the body transform proteins, fats and carbohydrates into energy. It helps maintain healthy skin and eyes and is also necessary for building and maintaining body tissues.

EU HEALTH CLAIMS:

Riboflavin contributes to normal energy-yielding metabolism.
Riboflavin contributes to normal functioning of the nervous system.
Riboflavin contributes to the maintenance of normal mucous membranes.
Riboflavin contributes to the maintenance of normal red blood cells.
Riboflavin contributes to the maintenance of normal skin.
Riboflavin contributes to the maintenance of normal vision.
Riboflavin contributes to the normal metabolism of iron.
Riboflavin contributes to the protection of cells from oxidative stress.
Riboflavin contributes to the reduction of tiredness and fatigue.

FOOD SOURCES: Milk, green vegetables, meat, fish, whole grains, cheese and eggs.

Niacin

ROLE: Niacin and niacinamide are essential for fat synthesis, protein metabolism and the conversion of food to energy.

EU HEALTH CLAIMS:

Niacin contributes to normal energy-yielding metabolism.
Niacin contributes to normal functioning of the nervous system.
Niacin contributes to normal psychological function.
Niacin contributes to the maintenance of normal mucous membranes.
Niacin contributes to the maintenance of normal skin.
Niacin contributes to the reduction of tiredness and fatigue.

FOOD SOURCES: Meat, fish, whole grains and wheat.

Pantothenic Acid

ROLE: Pantothenic acid is essential for the formation of certain nerve-regulating substances and hormones. It is also required for metabolism of proteins, fats and carbohydrates.

EU HEALTH CLAIMS:

Pantothenic acid contributes to normal energy-yielding metabolism.
Pantothenic acid contributes to normal synthesis and metabolism of steroid hormones, vitamin D and some neurotransmitters.
Pantothenic acid contributes to the reduction of tiredness and fatigue.
Pantothenic acid contributes to normal mental performance.

FOOD SOURCES: Yeast, liver, kidney, eggs, peanut products, rice bran, and wheat bran.

Vitamin B6

ROLE: Pyridoxine is necessary for energy metabolism, the formation of certain proteins and the use of amino acids. It also helps the nervous system to function properly and is essential to a healthy immune system. B6, along with folate and B12, is essential to heart health.

EU HEALTH CLAIMS:

Vitamin B6 contributes to normal cysteine synthesis.
Vitamin B6 contributes to normal energy-yielding metabolism.
Vitamin B6 contributes to normal functioning of the nervous system.
Vitamin B6 contributes to normal homocysteine metabolism.
Vitamin B6 contributes to normal protein and glycogen metabolism.
Vitamin B6 contributes to normal psychological function.
Vitamin B6 contributes to normal red blood cell formation.
Vitamin B6 contributes to the normal function of the immune system.
Vitamin B6 contributes to the reduction of tiredness and fatigue.
Vitamin B6 contributes to the regulation of hormonal activity.

US QUALIFIED HEALTH CLAIMS:

As part of a well-balanced diet that is low in saturated fat and cholesterol, Folic Acid, Vitamin B6 and Vitamin B12 may reduce the risk of vascular disease. FDA evaluated the above claim and found that, while it is known that diets low in saturated fat and cholesterol reduce the risk of heart disease and other vascular diseases, the evidence in support of the above claim is inconclusive.

FOOD SOURCES: Liver, salmon, walnuts, peanuts, wheat germ, bananas, grapes, carrots, peas, potatoes, beef, lamb and pork.

Water-soluble vitamins *continued*

Vitamin B12

ROLE: Along with folate, Vitamin B12 is necessary for the formation of DNA and the production of healthy red blood cells. It also helps maintain the nervous system and is essential to maintaining mental function. The lack of Vitamin B12 in the body causes pernicious anemia. Vitamin B12, along with B6 and folate, is essential to heart health.

EU HEALTH CLAIMS:

Vitamin B12 contributes to normal energy-yielding metabolism
Vitamin B12 contributes to normal functioning of the nervous system
Vitamin B12 contributes to normal homocysteine metabolism
Vitamin B12 contributes to normal psychological function
Vitamin B12 contributes to normal red blood cell formation
Vitamin B12 contributes to the reduction of tiredness and fatigue
Vitamin B12 has a role in the process of cell division

US QUALIFIED HEALTH CLAIMS:

As part of a well-balanced diet that is low in saturated fat and cholesterol, Folic Acid, Vitamin B6 and Vitamin B12 may reduce the risk of vascular disease. FDA evaluated the above claim and found that, while it is known that diets low in saturated fat and cholesterol reduce the risk of heart disease and other vascular diseases, the evidence in support of the above claim is inconclusive.

FOOD SOURCES: Kidney, liver, shellfish, sardines, salmon, herring and egg yolks.

Folate

ROLE: Folate is required for the formation of red blood cells, certain body proteins and genetic materials for the cell nucleus. It also helps to prevent macrocytic anemia, a disease in which the blood cells grow larger than normal and have a shorter lifespan. Pregnant women and those anticipating pregnancy should increase their consumption of folic acid to 400 mcg to prevent birth defects such as neural tube defects and spina bifida. Emerging science suggests it may play an important role in reducing risk of cardiovascular disease, dementia and certain cancers.

EU HEALTH CLAIMS:

Folate contributes to maternal tissue growth during pregnancy.
Folate contributes to normal amino acid synthesis.
Folate contributes to normal blood formation.
Folate contributes to normal homocysteine metabolism.
Folate contributes to normal psychological function.
Folate contributes to the normal function of the immune system.
Folate contributes to the reduction of tiredness and fatigue.
Folate has a role in the process of cell division.

US QUALIFIED HEALTH CLAIMS:

As part of a well-balanced diet that is low in saturated fat and cholesterol, Folic Acid, Vitamin B6 and Vitamin B12 may reduce the risk of vascular disease. FDA evaluated the above claim and found that, while it is known that diets low in saturated fat and cholesterol reduce the risk of heart disease and other vascular diseases, the evidence in support of the above claim is inconclusive.

0.8 mg folic acid in a dietary supplement is more effective in reducing the risk of neural tube defects than a lower amount in foods in common form. FDA does not endorse this claim. Public health authorities recommend that women consume 0.4 mg folic acid daily from fortified foods or dietary supplements or both to reduce the risk of neural tube defects.

FOOD SOURCES: Liver, beans, peanuts, almonds, green leafy vegetables, orange juice, strawberries, cantaloupe, whole wheat breads and cereals.

Biotin

ROLE: Biotin is necessary for synthesizing fatty acids and breaking down protein and carbohydrate molecules. It also helps in the maintenance of the thyroid and adrenal glands, nervous system, reproductive tracts and skin.

EU HEALTH CLAIMS:

Biotin contributes to normal energy-yielding metabolism.
Biotin contributes to normal functioning of the nervous system.
Biotin contributes to normal macronutrient metabolism.
Biotin contributes to normal psychological function.
Biotin contributes to the maintenance of normal hair.
Biotin contributes to the maintenance of normal mucous membranes.
Biotin contributes to the maintenance of normal skin.

FOOD SOURCES: Yeast, liver, kidney and eggs.

Vitamin C

ROLE: Vitamin C aids the body in the production of collagen, a substance that provides support to muscles, vascular tissues, bones and cartilage. Vitamin C aids in the absorption of iron and also contributes to the health of teeth and gums. It is one of the most important water soluble antioxidants in the body. Vitamin C is considered to enhance the immune response and play a protective role against cardiovascular disease, cataracts and certain types of cancer.

EU HEALTH CLAIMS:

Vitamin C contributes to maintain the normal function of the immune system during and after intense physical exercise.
Vitamin C contributes to normal collagen formation for the normal function of blood vessels.
Vitamin C contributes to normal collagen formation for the normal function of bones.
Vitamin C contributes to normal collagen formation for the normal function of cartilage.
Vitamin C contributes to normal collagen formation for the normal function of gums.
Vitamin C contributes to normal collagen formation for the normal function of skin.
Vitamin C contributes to normal collagen formation for the normal function of teeth.
Vitamin C contributes to normal energy-yielding metabolism.
Vitamin C contributes to normal functioning of the nervous system.
Vitamin C contributes to normal psychological function.
Vitamin C contributes to the normal function of the immune system.
Vitamin C contributes to the protection of cells from oxidative stress.
Vitamin C contributes to the reduction of tiredness and fatigue.
Vitamin C contributes to the regeneration of the reduced form of vitamin E.
Vitamin C increases iron absorption.

US QUALIFIED HEALTH CLAIMS:

Some scientific evidence suggests that consumption of antioxidant vitamins may reduce the risk of certain forms of cancer. However, FDA has determined that this evidence is limited and not conclusive.

Vitamin C and Gastric (Stomach) Cancer, "One weak study and one study with inconsistent results suggest that vitamin C supplements may reduce the risk of gastric cancer. Based on these studies, FDA concludes that it is highly uncertain that vitamin C supplements reduce the risk of gastric cancer."

FOOD SOURCES: Citrus fruits, potatoes, broccoli, sweet peppers, kale, cabbage, cauliflower, tomatoes, strawberries and acerola.

Fat-soluble vitamins

Vitamin A

ROLE: Vitamin A is necessary for vision, growth and tissue differentiation. It helps protect the cell membrane structure and is important for keeping the skin, eyes, and inner linings of the body healthy and resistant to infection. Vitamin A is also needed for the maintenance and growth of teeth, nails, hair, bones and glands.

EU HEALTH CLAIMS:

Vitamin A contributes to normal iron metabolism.
Vitamin A contributes to the maintenance of normal mucous membranes.
Vitamin A contributes to the maintenance of normal skin.
Vitamin A contributes to the maintenance of normal vision.
Vitamin A contributes to the normal function of the immune system.
Vitamin A has a role in the process of cell specialisation.

FOOD SOURCES: Liver, kidney, eggs, milk, butter, margarine, fish and fish liver oil.

Vitamin D3

ROLE: Vitamin D3 helps the body maintain and utilize the calcium and phosphorus needed to build strong bones and teeth. A deficiency of vitamin D3 can result in rickets, a disease in which the bones become bent or twisted. It helps calcium to reduce the risk of osteoporosis. Vitamin D3 contributes to the normal function of the immune system and healthy inflammatory response and to the maintenance of normal muscle function.

EU HEALTH CLAIMS:

Vitamin D contributes to normal absorption/utilisation of calcium and phosphorus.
Vitamin D contributes to normal blood calcium levels.
Vitamin D contributes to the maintenance of normal bones.
Vitamin D contributes to the maintenance of normal muscle function.
Vitamin D contributes to the maintenance of normal teeth.
Vitamin D contributes to the normal function of the immune system.
Vitamin D has a role in the process of cell division.
Vitamin D is needed for normal growth and development of bone in children.
Vitamin D may reduce the risk of falling. Falling is a risk factor for bone fractures.

FOOD SOURCES: Liver, fortified milk, margarine, fish liver oil and other fatty substances. A precursor in the skin is converted to vitamin D3 by sunlight.

EU HEALTH CLAIMS were retrieved from the EU Register of nutrition and health claims made on foods: <http://ec.europa.eu/nuhclaims>

US QUALIFIED HEALTH CLAIMS were retrieved from the FDA's food labeling and nutrition register: <http://www.fda.gov/Food/LabelingNutrition/LabelClaims/QualifiedHealthClaims/ucm073992.htm>

Fat-soluble vitamins *continued*

Vitamin E

ROLE: Vitamin E helps protect cell membranes. It also helps maintain the immune system, prolong the life of red blood cells, maintain a healthy circulatory system and facilitate the body's full utilization of vitamin A. Vitamin E is found in all body tissues and is important for their health and proper functioning. Vitamin E is an antioxidant and is considered to play a role in neutralizing free radicals. These highly reactive molecules are found in the body as a result of normal body processes and from external factors such as environmental pollution. Oxidative damage caused by these reactive molecules is considered to contribute to aging and age-related chronic diseases such as cataracts, heart disease and cancer.

EU HEALTH CLAIM:

Vitamin E contributes to the protection of cells from oxidative stress.

US QUALIFIED HEALTH CLAIMS:

Some scientific evidence suggests that consumption of antioxidant vitamins may reduce the risk of certain forms of cancer. However, FDA has determined that this evidence is limited and not conclusive.

Vitamin E and Bladder Cancer, "One small study suggests that vitamin E supplements may reduce the risk of bladder cancer. However, two small studies showed no reduction of risk. Based on these studies, FDA concludes that it is highly unlikely that vitamin E supplements reduce the risk of bladder cancer." Vitamin E and Colorectal Cancer, "Two weak studies and one study with inconsistent results suggest that vitamin E supplements may reduce the risk of colorectal cancer. However, another limited study showed no reduction of risk. Based on these studies, FDA concludes that it is highly unlikely that vitamin E supplements reduce the risk of colorectal cancer."

Vitamin E and Renal Cancer, "One weak and limited study suggests that vitamin E supplements may reduce the risk of renal cell cancer. FDA concludes that it is highly uncertain that vitamin E supplements reduce the risk of renal cell cancer."

FOOD SOURCES: Nuts, seeds, oil fruits and vegetables.

Vitamin K₁

ROLE: Vitamin K₁ is essential for the clotting of blood. In a healthy person, bacteria in the intestine normally provide a substantial amount of this vitamin. A deficiency may occur in newborns and in people consuming antibacterial agents over a long period. These people are frequently given vitamin K under a doctor's care. Vitamin K₁ may help maintain bone health.

EU HEALTH CLAIMS:

Vitamin K contributes to normal blood clotting.

Vitamin K contributes to the maintenance of normal bones.

FOOD SOURCES: Green leafy vegetables, liver and soy beans, egg yolks, wheat, oats, potatoes, asparagus, butter and cheese.

Nutritional lipids

life'sDHA™ (omega-3 oils)

ROLE: DHA, an omega-3 fatty acid, is a major structural fat in the brain and eyes. It accounts for up to 97 percent of the omega-3 fats in the brain and up to 93 percent of the omega-3 fats in the eye. A growing body of research continues to support the important role that DHA plays for both mother and baby. DHA is important for optimal infant brain, eye and nervous system development, and has been shown to support healthy pregnancy.

EU HEALTH CLAIMS:

DHA contributes to maintenance of normal brain function.

DHA contributes to the maintenance of normal vision.

DHA maternal intake contributes to the normal brain development of the foetus and breastfed infants.

DHA intake contributes to the normal visual development of infants up to 12 months of age.

US QUALIFIED HEALTH CLAIMS:

Supportive but not conclusive research shows that consumption of EPA and DHA omega-3 fatty acids may reduce the risk of coronary heart disease. One serving of [Name of the food] provides [] gram of EPA and DHA omega-3 fatty acids [See nutrition information for total fat, saturated fat, and cholesterol content].

Note: Dietary supplements may declare the amount of EPA and DHA per serving in "Supplement Facts", instead of making the declaration in the claim.

FOOD SOURCES: The primary dietary source of DHA is fatty fish. Dietary sources for infants include breast milk and DHA/ARA-fortified infant formula. Unfortunately, women of childbearing age who consume a typical Western diet are at risk for low stores of DHA.

life'sARA™ (omega-6 oils)

ROLE: ARA, a long-chain omega-6 fatty acid, is the principal omega-6 in the brain and is abundant in other cells throughout the body. It is also a precursor to a group of hormone-like substances called eicosanoids that play a role in immunity, blood clotting, and other vital functions in the body. Like DHA, ARA occurs naturally in breast milk and is important to infant development.

FOOD SOURCES: Dietary sources for infants include breast milk and DHA/ARA-fortified infant formula. Most women receive adequate amounts of ARA by eating foods that are plentiful in the Western diet, such as meat, eggs and milk.

MEG-3® and *life'sOMEGA™* (omega-3 oils)

ROLE: Contain eicosapentaenoic acid (EPA) and docosahexaenoic acid (DHA). Recent research has shown these compounds to have triglyceride lowering activity, which may be helpful in reducing the risk of cardiovascular diseases. DHA has been shown, in some studies, to improve visual function in pre-term and term infants.

EU HEALTH CLAIMS:

EPA and DHA contribute to the normal function of the heart.

US QUALIFIED HEALTH CLAIMS:

Supportive but not conclusive research shows that consumption of EPA and DHA omega-3 fatty acids may reduce the risk of coronary heart disease. One serving of [Name of the food] provides [] gram of EPA and DHA omega-3 fatty acids [See nutrition information for total fat, saturated fat, and cholesterol content].

Note: Dietary supplements may declare the amount of EPA and DHA per serving in "Supplement Facts", instead of making the declaration in the claim.

FOOD SOURCES: Fish (mackerel, herring, sardines, tuna) and dietary supplements. Canadian data suggest 0.56 gm/100 kcals or at least 0.5% of energy.

life'sGLA™ (omega-6 oils)

ROLE: Rich source of gamma linolenic acid (GLA). As suggested in recent research, GLA may be helpful in suppressing or reducing inflammation in atopic eczema and psoriasis. Involved in the restoration of the natural moisture barrier of the skin.

FOOD SOURCES: Plants (Evening Primrose and Borage) and dietary supplements. Canadian data suggest 3.3 gm/100 kcals or at least 3% of energy.

Labeling and compendia / certification

Labeling

In general, vitamins, carotenoids and other nutraceuticals are relatively sensitive products, and the storage stability is influenced by many factors. For this reason, indications of the relevant storage conditions are given on the labels of most of the products.

Compendia/Certification

Our material complies, when stated in the Product Data Sheet, with the appropriate monographs of the below mentioned compendia. It is the responsibility of the manufacturing company to ensure that the final product is manufactured according to current local regulations and standards.

USP

United States Pharmacopoeia (current edition) including National Formulary (current edition) and supplements.

FCC

Food Chemicals Codex (current edition) and supplements.

Ph. Eur.

European Pharmacopoeia (current edition) and supplements.

JECFA

Codex Alimentarius Standard.

Joint FAO/WHO Expert Committee on Food Additives (JECFA).

CEP

The role of the Certificate of Suitability (CEP) is to demonstrate that the purity of a given substance produced by a specific manufacturer is suitably controlled and in compliance with the relevant monograph(s) of the European Pharmacopoeia. It is granted by the European Directorate for the Quality of Medicines (EDQM).

CEPs have been granted for the following products:

β-Carotene	(Pro-Vitamin A)
dl-α-Tocopheryl acetate	(Vitamin E)
d-α-Tocopheryl acetate	(Natural Source Vitamin E)
Ascorbic acid	(Vitamin C)
Ascorbyl palmitate	(Vitamin C palmitate)
Biotin	(Vitamin H, Vitamin B7)
Calcium ascorbate	(Vitamin C)
Calcium D-Pantothenate	(Calpan/Vitamin B5)
Cholecalciferol	(Vitamin D3)
Cyanocobalamin	(Vitamin B12)
Dexpantenol	(Panthenol, Vitamin B5)
Dextromethorphan hydrobromide	
Folic acid	(Vitamin B9)
Niacinamide	(Vitamin B3)
Phytomenadione	(Vitamin K1)
Pyridoxine hydrochloride	(Vitamin B6)
Riboflavin Fermentation process	(Vitamin B2)
Riboflavin sodium phosphate	(Vitamin B2)
Sodium ascorbate	(Vitamin C)
Thiamine hydrochloride	(Vitamin B1)
Thiamine mononitrate	(Vitamin B1)
Vitamin A palmitate	(Vitamin A)
Vitamin A acetate	(Vitamin A)

FDA

Drug Master Files (DMF) are available for the following products:

Dextromethorphan hydrobromide

Vitamin D3 Cryst

BONISTEIN® (Genistein)

Kosher Halal

Appropriate Kosher and Halal symbols of certification have been affixed to denote affiliation:

OU Kosher Kashruth Division of the Orthodox Union (Union of Orthodox Jewish Congregation of America). Products certified as:

- Kosher Pareve/Parve or
- Kosher Pareve/Parve Kosher for Passover or
- Kosher Pareve/Parve and Kosher Fish or
- Kosher Dairy.

BK Products certified by Basdatz Kashruth Basle, as:

- Kosher for Passover, Pareve/Parve or
- Kosher for Passover – Kitniot or
- Kosher Pareve/Parve, Not for Passover use

Kosher Ko Orthodox Kashrut Service Group (USA)

Kosher Star-K Certification (USA)

Halal-Ifanca – The Islamic Food and Nutrition Council of America

Halal-MUI - Majelis Ulama Indonesia

Information concerning Kosher and Halal certification is available on request.

Specific Product Information

Product Data Sheets and Safety Data Sheets are available for all products listed in this catalogue. They contain information on specification, composition, stability and storage conditions.

Some of the listed products are used either as vitamins (nutrients) or as food additives for technological purposes; some of them serve both purposes. As food additive they are permitted in most countries. However, there are special local regulations according to which the use of food additives is restricted. It is therefore advisable to consult the corresponding food regulation.

For further information on our products (local availability and prices), please contact a DSM Account Manager or one of the addresses listed on the back cover.

DSM and responsibility

DSM in partnership with the World Food Programme

In March 2007 DSM announced an official partnership with the United Nation's World Food Programme (WFP). WFP is the largest provider of food aid to the world's hungry. They feed and nourish an average of 90 million people in over 80 countries each year.

The WFP – DSM partnership program, 'Improving Nutrition – Improving Lives' is a commitment to fight hunger and malnutrition around the world. DSM provides technical and scientific expertise and high nutrient products as well as financial assistance to improve the WFP food basket through the addition of essential micronutrients. Together, DSM and WFP make a difference to millions of people. Improving nutrition means fighting 'hidden hunger', improving lives, breaking the vicious circle of poverty and hunger. This is a major contribution to unleashing potential in countries and their economies.

Sight and Life™

A humanitarian initiative for better nutrition and improved well-being

Sight and Life™ is a humanitarian nutrition think tank of DSM. We believe that the right mix of funding, knowledge, technology and policy will lead to better health for the world's most vulnerable populations, and we use advocacy and leadership to address societal changes affecting dietary quality. We disseminate information that reflects evolving scientific evidence, aiming to promote partnerships that can solve pressing problems. We believe that the scourge of malnutrition should be addressed in an integrated and holistic manner.

Nutrition Improvement Program

Nutrition Improvement Program

Unlocking human potential

DSM's Nutrition Improvement Program (NIP) aspires to be your partner of choice in the global fight against hidden hunger. We offer nutritious, safe and affordable solutions tailored to the needs of local communities in the developing world, with a special focus on women and children. NIP responds to the challenges of improving nutrition in three ways: 1. We develop products for specific target groups and needs; 2. We support staple food fortification programs; 3. We develop new sustainable and inclusive business models.

Dow Jones World Sustainability World Index

Royal DSM has once again retained its number one position in the chemical industry sector in the Dow Jones Sustainability World Index. This is the third consecutive year that DSM has held this top position in worldwide sustainability and the sixth time in total since 2004. In 2007 and 2008, the two years when DSM wasn't ranked number one, it was still among the leaders in the sector.
